City MIHAI VITEAZU: str. Navodari, nr.4

The factory is located in the Istria Bardak area north of Constanta. The buildings were built in 1979 and consist of a 3rd floor building containing a laboratory and warehouse. Storage basement with concrete tanks.

The factory was built for the production of wine but can be used for a number of purposes within agriculture and food. With its location on a main road near Constanta, there is easy access to the port for exporting and importing goods.

The factory can be rented or bought. It is possible to obtain support from the EU for the establishment of a number of productions that use the area's raw materials. For owners who want to start production, it is possible to rent the factory for a number of years at a low rent of €1 per person. square meters building per month, where the rent will change as production is established on site.

The tenants can, after a number of years, buy the property at an agreed price. The advantage of setting up here is that the land and buildings are already connected to electricity, water and drainage, and that the existing buildings can quickly be used for production after refurbishment.
